

JEDI™ TELESCOPE INSTRUCTION MANUAL

6+
15162

Using your Jedi™ Telescope

Telescope Mode

1. Turn the image dial until you no longer see an image and are looking through the telescope.
2. Slide the fast-focus grip to quickly put the image into focus. Then turn the fine focus dial to put the image in sharper focus.

Space Image Mode

Turn the image dial while looking through your telescope. As you rotate the dial through the images (moving the wheel clockwise), refer to the educational guide to learn more about what you are seeing. For best image viewing, point the telescope objective lens toward a light source.

Care and Cleaning

- Clean the telescope with a damp or dry cloth only.
- Do not immerse in water or any other liquid.
- To clean lenses, use a soft cloth. Do not use tissue paper, as it may scratch the lenses.

**KEEP THESE INSTRUCTIONS FOR FUTURE
REFERENCE — DO NOT DISCARD**
