LIGHTSABER™ CRYSTAL GROWING LAB

ADULT SUPERVISION REQUIRED

1 Heat 400 ml (1 2/3 cups) of water until boiling.

Important: Do not use the lab growing chamber in a microwave or on a stove.

2 Pour 300 ml (1 1/3 cups) of the boiling water into a measuring cup.

Important: Do not pour directly into the lab growing chamber.

3 Pour the contents of packet A into the measuring cup.

4 Stir until fully dissolved

5 Let cool for 10 minutes.

6 Pour into the growing chamber.

7 Pour the contents of packet B into the chamber and carefully place in a warm area of the house where it will not be moved.

Note: Crystals need temperature above 20° C (68° F) to grow properly.

8 While growing, periodically remove crystals above the waterline without disturbing the solution.

Important: Do not stir or put the lid on the container while crystals are growing.

9 After the crystals have grown (approximately 7 days), slowly pour the remaining water out of the chamber.

10 Gently rinse crystals in water.

12 Let the crystals dry inside the chamber for 5 days.

13 Install batteries into the base for lighted display.

14 Put the cover onto the top of the chamber. Slide the switch to turn on the light.

! Fragile!

BATTERY SAFETY INFORMATION

- Only adults should install and replace batteries.
- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the toy before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Different types of batteries or new and used batteries are not to be mixed.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the toy.
- The supply terminals are not to be short-circuited.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.
- Do not dispose of batteries in fire. Battery may explode or leak.
- Batteries should be recycled or disposed of as per state and local guidelines.
