General Instructions

1. Solar Racers work best outside on a bright and sunny day, with the sun directly overhead.
2. Your Solar Racer features an adjustable solar panel so you can point the panel towards the sun. For best results, angle the solar panel so it is perpendicular to the sun's rays. (See Fig. 1 & 2)
3. For best performance, race on a smooth, paved surface free of small rocks, leaves, sticks or other debris.

Stopping Your Solar Racers™

Your Solar Racer will stop whenever it enters a shadowed area. If you want to stop your Solar Racers, just place your hand between the sun and the Solar Racer to create a shadow.
